101						
	ction Per	Temperature		emperature=2	25°C(77° F) Operating vo Conditions concerning th	<u> </u>
4-1 Dete Con	ction Per	or measuring: Am	Ň			ne target

Note1:Depending on the temperature difference between the target and the surroundings, detection range will change.

		Value		Notes
	Horizontal	62°	$(\pm 31^\circ$)	
Detection Area	Vertical	62°	$(\pm 31^\circ$)	Refer to the section 4-5.
	Detection zones		128	

4-2 Maximum Rated Values

	Value	Unit
Power Supply Voltage	-0.3~7.0	VDC
Usable Ambient Temperature	-20∼+60°C (-4∼+140° F) Do not use in a freezing or condensation environment	
Storage Temperature	-20∼+70°C (-4∼+158° F)	

4-3 Electrical Characteristics

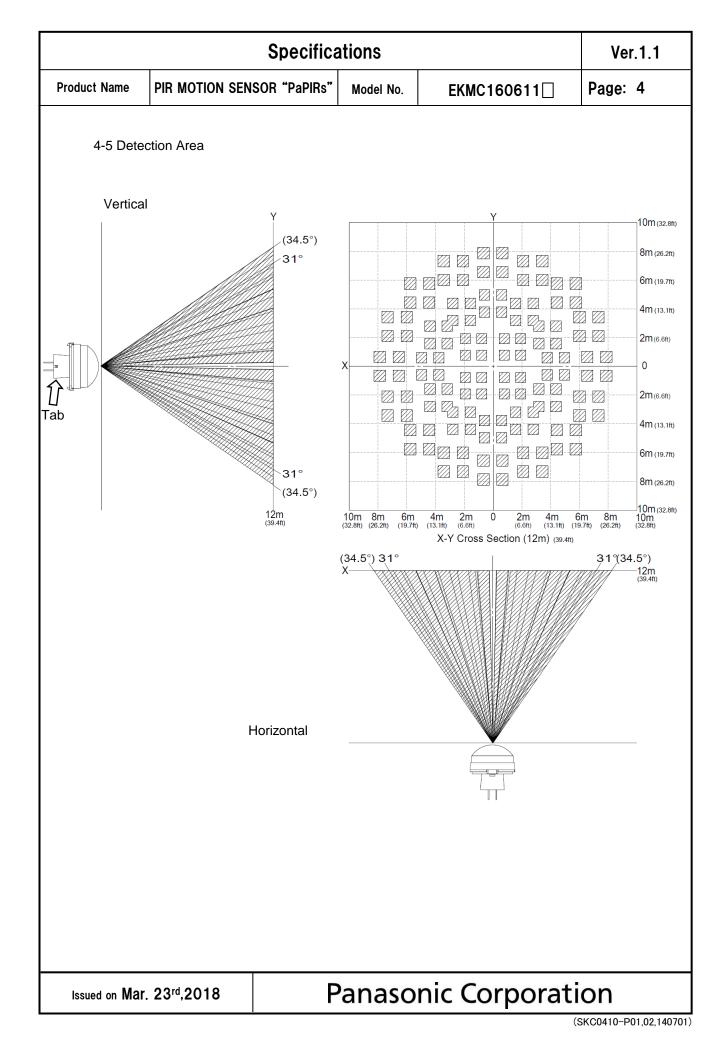

Conditions for Measuring: Ambient temperature=25°C(77° F)

	Symbol	Min	Avg.	Max	Unit	Special mention
Operating Voltage	Vdd	3.0	_	6.0	VDC	—
Electrical Current Consumption	Iw	_	170	300	μA	lout=0
Output Current	lout	—	_	100	μA	Vout≧Vdd-0.5
Output Voltage	Vout	Vdd-0.5	_	_	VDC	—
Circuit Stability Time (when voltage is applied)	Twu	_	_	30	S	_

5. Safety Precautions

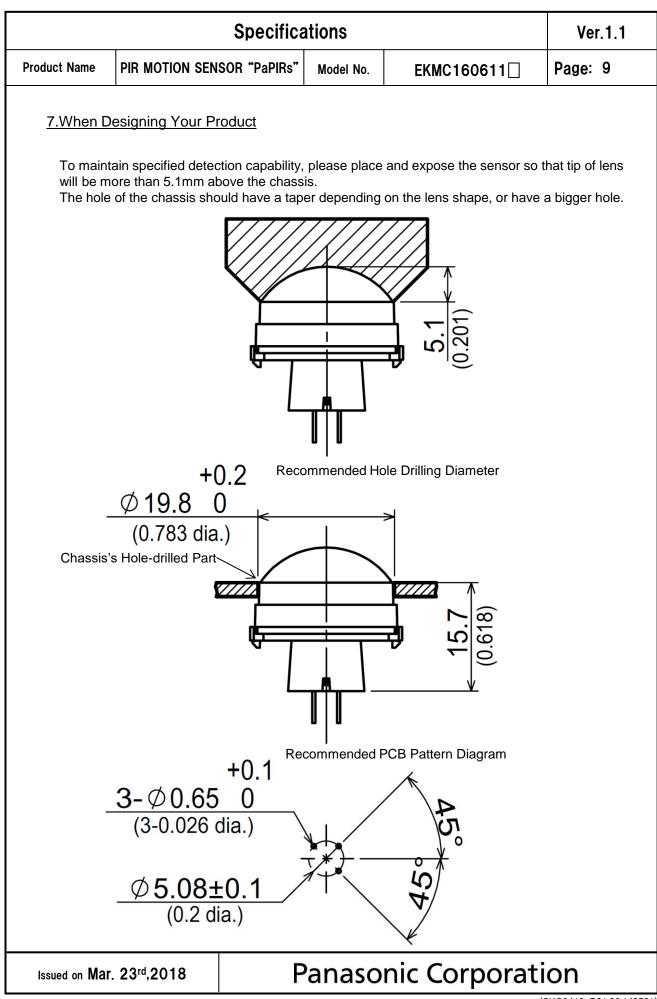

Head the following precautions to prevent injury or accidents.

- Do not use these sensors under any circumstance in which the range of their ratings, environment conditions or other specifications are exceeded. Using the sensors in any way which causes their specifications to be exceeded may generate abnormally high levels of heat, emit smoke, etc., resulting in damage to the circuitry and possibly causing an accident.
- 2) Our company is committed to making products of the highest quality and reliability. Nevertheless, all electrical components are subject to natural deterioration, and durability of a product will depend on the operating environment and conditions of use. Continued use after such deterioration could lead to overheating, smoke or fire. Always use the product in conjunction with proper fire-prevention, safety and maintenance measures to avoid accidents, reduction in product life expectancy or break-down.
- Before connecting, check the pin layout by referring to the connector wiring diagram, specifications diagram, etc., to verify that the connector is connected properly. Mistakes made in connection may cause unforeseen problems in operation, generate abnormally high levels of heat, emit smoke, etc., resulting in damage to the circuitry.
- 4) Do not use any motion sensor which has been disassembled or remodeled.
- 5) Failure modes of sensors include short-circuiting, open-circuiting and temperature rises. If this sensor is to be used in equipment where safety is a prime consideration, examine the possible effects of these failures on the equipment concerned, and ensure safety by providing protection circuits or protection devices. Example :
 - Safety equipments and devices
- Traffic signals
- Burglar and disaster prevention

6.Operating Precautions						
6-1 Basic Pr	inciples					
However, i heat sourc	a pyroelectric infrared sensor tha it may not detect in the following of e. Besides, it could also detect th and reliability of the system may	cases: lack of le presence of	movement, no temperature f heat sources other than a h	numan body.		
1) Detecti	ng heat sources other than the h	uman body, s	uch as:			
b) When beam h c) Sudde	animals entering the detection an a heat source for example sun lig hit the sensor regardless inside of n temperature change inside or a VAC, or vapor from the humidifie	ght, incandeso r outside the c around the def	letection area.			
2) Difficult	y in sensing the heat source					
a corre b) Non-m	acrylic or similar materials stand ect transmission of infrared rays, ovement or quick movements of e refer to 4-1 for details about mo	the heat sour	ce inside the detection area.	-		
3) Expans	sion of the detection area					
	f considerable difference in the a area may be wider apart from th	•	•	temperature,		
4) Malfun	ction / Detection error					
output du	Unnecessary detection signal might be outputted, on rare occasions, come from sudden outbreak output due to the nature of pyro-electric element. When the application does not accept such condition strictly, please implement the countermeasure by introducing pulse count circuit etc.					
6-2 Optima	6-2 Optimal Operating Environment Conditions					
 6-2 Optimal Operating Environment Conditions 1) Temperature : Please refer to the maximum rated values of 4-2. 2) Humidity Degree :15~85% Rh (Avoid condensation or freezing of this product) 3) Pressure : 86~106kPa 4) Overheating, oscillations, shocks can cause the sensor to malfunction. 5) This sensor is not waterproof or dustproof. Avoid use in environments subject to excessive moisture, condensation, frost, containing salt air or dust. 6) Avoid use in environments with corrosive gases.

8.Special Notice

As improvements are continually being made, the specifications or design of this product are subject to change without notice.

Please strictly follow the "Safety Precautions" and "Operating Precautions" on the specifications sheet. Normal functioning cannot be expected if used in environments or conditions other than those specified above.

We are deeply committed to providing the highest quality control for this product. Nevertheless:

- For issues not addressed above, we invite you to share your suggestions, or details about your company's usage conditions, installation, specifications, needs of end users, and applications for this sensor.
- 2) To reduce the risk of harm caused by product failure to human life or assets, this product should always be used in conjunction with other safety measures, such as protective circuitry, double layered circuit boards, etc., and used within the guaranteed performance, efficiency or special characteristics values stated in the specification sheet.
- 3) This product is warranted for a period of one year, from date of delivery, applicable only if the product is used in accordance with the precautions mentioned above and the specifications sheet. We will replace or repair at the delivery location any malfunctioning or defective part or entire product if such defect or malfunction is caused by us.

However, the above warranty shall be void in the following circumstances:

- a) Damage caused to something else than the product itself.
- b) Damage or loss resulting during transportation, storage or handling after the date of supply.
- c) Phenomenon unforeseeable in the state of the technology as of the supply date.
- d) Damage caused by natural or unnatural events such as fire, earthquake, flood, or conflicts beyond our control.
